For Use by Licensed Professionals Only

*Read all instructions and refer to video before starting treatment.

PRODUCTS:

T180 PROFESSIONAL™
**Keratin Smoothing
Treatment**

T180 PROFESSIONAL™
Protective Serum

- 1 EVALUATE**
Evaluate the client's hair, e.g., normal, damaged, dry, or brittle.
- 2 DRY HAIR**
Apply on dry hair (washed or unwashed). It is not necessary to wash your hair unless it is; a) extremely dirty, b) has gel residue, c) was washed recently with anti-dandruff shampoo.
- 3 WASH**
If hair has an excessive amount of chemical residue or has been chemically relaxed (i.e., Japanese, or permanent straightening), wash client's hair (repeat if necessary) with a deep cleansing shampoo before applying the T180 PROFESSIONAL™ Keratin Smoothing Treatment. Rinse and dry thoroughly before applying the treatments.
- 4 APPLY**
Apply a few drops of T180 PROFESSIONAL™ Protective Serum only on the ends or the sensitized parts of dry hair.
- 5 APPLICATION**
Divide the hair into 4 parts, e.g., same as coloring. Begin application of T180 PROFESSIONAL™ Keratin Smoothing Treatment at the nape in 1-2 inch sections working up to the top of the head - apply 1/2" to 3/4" from the scalp to the tips, including the most resistant parts without touching the scalp.
- 6 SPREAD FOAM**
Press the foam pump 2 – 3 times (top, middle, and ends). Spread the foam with your gloved hands, ensuring the distribution of the product, and then comb gently without pulling or stretching the hair.
- 7 HEAT SOURCE**
Place a plastic cap on your client's hair and leave under the heat source during the time shown in the Smoothing Parameters Heat Table. Remove from heat source. Refer to "Extra Time Without Heat" in the Smoothing Parameters Heat Table for the exact amount of time based on hair type and texture.

Highlighted and/or Color Treated	10	15
Normal and/or Resistant	15	30
Coarse and/or Very Resistant	20	40

T180 PROFESSIONAL™

8 RINSE

Rinse out the product with water. If you prefer, hair can be gently washed with T180 PROFESSIONAL™ Vitalizing Shampoo; free of parabens, salt, sulfates, and phthalates.

9 BLOW DRY

Towel dry, then blow-dry hair with a round brush. The use of an ionic blow dryer promotes better results during treatment.

10 FINISHING

Finalize by applying 1 to 3 pumps of the T180 PROFESSIONAL™ Protective Serum on the hands and apply throughout the hair.

11 MAINTENANCE

We recommend that clients use T180 PROFESSIONAL™ products for the best long-lasting results after receiving this treatment.
