

T180 PROFESSIONAL®

RESTORATIVE TREATMENT

For Use by Licensed Professionals Only

PRODUCT:

T180 PROFESSIONAL® Restorative Treatment

COLOR TREATMENTS: Client's hair can be color-treated the same day they receive the T180 PROFESSIONAL® Restorative Treatment.

- 1 Evaluate the client's hair, e.g., normal, damaged, dry, or brittle.

The T180 PROFESSIONAL® Restorative Treatment is essential if the hair is badly damaged, dry, or brittle. Depending on health of the hair, it is recommended this treatment be applied 1-3 times on a biweekly basis until hair becomes healthy.
- 2 Wash the hair with T180 PROFESSIONAL® Vitalizing Shampoo to eliminate residue from previous procedures or treatments (repeat if necessary), and rinse well. Towel dry the hair and comb.
- 3 Apply T180 PROFESSIONAL® Restorative Treatment (start with ¼ oz and use more if necessary) from root to tip. Comb through thoroughly.
- 4 Place a plastic cap over hair and leave:
 - a. 20 minutes without heat.
 - b. 10 minutes with medium heat.
- 5 Rinse well to remove the product. Towel dry the hair.
- 6 Blow-dry (we recommend an ionic blower).

After each application, the Licensed Professional will determine if the hair is healthy or if more Restorative Treatments are necessary. If additional treatments are needed, the above process can be repeated as necessary.
- 7 For the best long-lasting results, use T180 PROFESSIONAL® Hair Care Therapy products.
- 8
